جامعة قطر QATAR UNIVERSITY

Department of Chemistry and Earth Sciences

Liquid Nitrogen and solid CO₂ on display at the Qatar University tent on National Day. An excellent opportunity to outreach to potential chemists of the future and showcase how Chemistry is useful in our day to day lives. Other fun hands on activities included making elephant toothpaste, rainbow reaction chemical garden.

The Department of Chemistry and Earth Sciences (DCES) with the unwavering support of its Head of Department and the Department Outreach and Engagement and Activities committees. They certainly made our participation at the National Day Darb al Saii event all the more successful.
